computers & industrial engineering

Contents Vol. 27, Nos 1–4, 1994

SELECTED PAPERS FROM THE 16th ANNUAL CONFERENCE ON COMPUTERS AND INDUSTRIAL ENGINEERING

xiii Preface

SCHEDULING AND SEQUENCING

Jian Dong and **Hamid R. Parsaei** — 1 Design and implementation of a Feature-based Automated Process Planning (FBAPP) system

Kang Duk Su — 5 How a leading heavy industries co., ltd. in Korea implements JIT philosophy to its operations

Dong-il Yoo and **Hiroshi Ohta** — 11 Optimal product-planning for new multiattribute products based on conjoint analysis

Juichin Jiang and **Wen-chieh Hsiao** — 15 Mathematical programming for the scheduling problem with alternate process plans in FMS

Hiroki Ishikura — 19 Study on the production planning of apparel products: determining optimal production times and quantities

Kazuko Morizawa, Hiroyuki Nagasawa and **Noriyuki Nishiyama** — 23 Complex random sample scheduling and its application to an $N/M/F/F_{max}$ problem

Ill-Soo Kim, Animesh Basu and **Elias Siores** — 27 Design of a Computerized Scheduling System for best rule analysis and control

Elizabeth M. Ehlers, Eugenè van Rensburg and **Riaan L. van der Merwe** — 31 Intelligent scheduling in the manufacturing environment

Naoto Hoshino and **Yoichi Seki** — 35 Application of statistical inference for partially ordered hypotheses

Shusuke Okamoto, Ichie Watanabe and **Hajime Iizuka** — 39 A new optimal algorithm for the permutation flow-shop problem and its parallel implementation

FLEXIBLE MANUFACTURING SYSTEM

Hiroshi Takahashi, Hiroyuki Kamata, Tadashi Masuyama and **Shigeru Sarata** — 43 Concept and model experiments on automatic shoveling of rocks from the rock piles

Yang-Byung Park — 47 Optimizing robot's service movement in a robot-centered FMC

J. M. Kim, K. B. Choi, Y. K. Chung and **S. S. Kim**	51	Developing a generic FMS for small to medium size industries of Korea
Sigeki Shotaka, Masahiro Nakamura and **Genji Yamazaki**	55	A solution methodology for optimal number of machines operated by a single worker
Youssef A. Youssef, Yves Beauchamp and **Marc Thomas**	59	Comparison of a full factorial experiment to fractional and Taguchi designs in a lathe dry turning operation
Gen'ichi Yasuda and **Keihachiro Tachibana**	63	A parallel distributed control architecture for multiple robot systems using a network of microcomputers
Gürsel A. Süer and **Marcos Ortega**	67	A machine level based-similarity coefficient for forming manufacturing cells
Zhao Xiaobo and **Katsuhisa Ohno**	71	A sequencing problem for a mixed-model assembly line in a JIT production system
Hiroshi Katayama	75	FMS tool change schemes and their characteristics
Hisao Shiizuka and **Misa Suzuki**	81	Modeling of AGV networks in flexible manufacturing systems
Hark Hwang and **Jae-Won Ha**	87	An optimal boundary for two class-based storage assignment policy in carousel system

CAD/CAM & CIM/CAPP

Zbigniew J. Czajkiewicz and **Tomasz R. Wielicki**	91	CIM—a journey to manufacturing excellence
J. T. Lim, H. M. Rho and **K. K. Cho**	95	A knowledge-based process planning system for injection mold
Mukasa E. Ssemakula and **Wesley J. Cloyd**	99	Functional specification of a dynamic process planning system
K. P. Rao, W. L. Xu and **Y. W. Lam**	103	Nonsymmetric streamlined extrusion dies through computer aided engineering
In-Ho Kim and **Kyu-Kab Cho**	107	An integration of feature recognition and process planning functions for turning operation
Young-Jo Kim and **Young-Kyu Kim**	111	Design of a coating system using SIMAN: a case study
Moo Young Jung and **Kyung Huy Lee**	115	Conceptual framework for automated process planning
Dah-Chuan Gong and **Kuang-Fu Lin**	119	Conceptual design of a shop floor control system from $IDEF_0$

Eric Wang and **Yong Se Kim**	123	Inductive generation of combination operations for form feature recognition using convex decomposition
Kenji Yura, Kazumasa Ohashi, Masaru Nakajima, Masataka Yoshimura, Masaharu Ota and **Katsundo Hitomi**	127	Strategic planning for CIM to enhance the competitive ability
Liwen Liu	131	The changing manufacturing organization with CIM
Feng Li and **Joe G. Chow**	135	Development of a CAD-based intelligent manufacturing system
Takaya Ichimura, Takenori Aoki and **Guo Fang Song**	139	The effectiveness of system integration in CIMS of Japanese companies
Daiju Nakagiri and **Sennosuke Kuriyama**	143	A study on production planning for CIM
John S. Morris and **Linda J. Morris**	147	Problems in CIM implementation: a case study of nine CIM firms
Toyokazu Nose, Sennosuke Kuriyama and **Kiyotaka Akou**	151	A design for management information system by work-design technique

DECISION SUPPORT SYSTEMS

Wang Yingluo, Xi Youmin, Feng Gengzhong and **Jing Runtian**	155	A study of the information organizing technique of DSS
Chang Eun Kim	161	Markov decision process: fuzzy approach
Hyun-a Choi, Eui-ho Suh and **Chang-kyo Suh**	167	Analytic hierarchy process: it can work for group decision support systems
A. Ajmal	173	Intelligent knowledge based expert inventory control system for computer integrated manufacturing
Chi-Fa Ku, Xijin Tang and **Yikui Dong**	177	The development of decision support systems in China
S. S. Kim	181	A synchronization scheme for real and simulated events
Sandra Parker, Eric M. Malstrom, Lisa M. Irwin and **Grant DuCote**	185	A decision support system for personnel scheduling in a manufacturing environment

Tadashi Dohi, Naoto Kaio and **Shunji Osaki** 197 Optimal order limit policy under cost effectiveness criterion

INVENTORY CONTROL

Toshio Odanaka, Keiichi Yamaguchi and **Tadayuki Masui** 201 Multi-echelon inventory production system solution

Shusaku Hiraki, Norio Watanabe, Yoshiaki Ishihara and **Su Yuan-Ming** 205 Modeling an international co-operative global complementary production system

Ilkyeong Moon and **Sangjin Choi** 209 The distribution free continuous review inventory system with a service level constraint

Katsuhiko Takahashi 213 Determining the number of Kanbans for unbalanced serial production systems

Pisal Yenradee 217 Application of optimized production technology in a capacity constrained flow shop: a case study in a battery factory

Muhammad Asim Mirza and **Eric M. Malstrom** 221 Required setup reductions in JIT driven MRP systems

Xu Zhuqi and **Hiraki Shusaku** 225 A study on sequencing method for the mixed-model assembly line in just-in-time production systems

Beumjun Ahn, Norio Watanabe and **Shusaku Hiraki** 229 A mathematical model to minimize the inventory and transportation costs in the logistics systems

LOCATION, TRANSPORTATION & DISTRIBUTION

Ken-ichi Tsukamoto, Yasuhiro Matsuoka, Hirohisa Seki and **Hidenori Itoh** 233 A parallel program for an urban-traffic analization and its evaluation

Hamid Seifoddini and **Manoocher Djassemi** 237 Analysis of efficiency measures for block diagonal machine-component charts

Heung-Suk Hwang 241 A study on a probabilistic two-echelon location system for deteriorating items

Thomas L. Landers, Melinda K. Beavers, Malik Sadiq and **Don E. Stuart** 245 Software for dynamic reconfigurable order picking systems

Rakhmat Ceha and **Hiroshi Ohta** 249 The evaluation of air transportation network based on multiple criteria

Takeo Takeno, Kenichiro Matsui, Genji Yamazaki and **Toshihiro Ishikawa** 253 Heuristic approach to allocation of trucks in a transportation system

Wan Weiwu and **Kang Jun** 257 Highway transportation comprehensive evaluation

Young-Q Lee and **Soundar R. T. Kumara** 261 A scheme for mechanical assembly design and assembly line layout conceptualization

EXPERT SYSTEMS

Yanwen Dong and **Masatoshi Kitaoka** 265 Implementation of a case-based production scheduling system in C language

Edward L. Parkinson, Max L. Hailey, Ching F. Lo, Bruce A. Whitehead, George Z. Shi and **George W. Garrison** 269 Integration architecture of expert systems, neural networks, hypertext, and multimedia can provide competitive opportunities for industrial applications

Keytack H. Oh 273 Expert Preference System—computer assisted system for developing expert utility functions

Y. Sakai, M. Kitazawa, Y. Okuno and **M. Nakamura** 277 Experience-based vehicle operation

Shigehiro Masui, Toshiro Terano, Masayoshi Yumino and **Setsuko Mimori** 281 Decision making support system for house purchase by using fuzzy logic

Demet Bayraktar and **Sıtkı Gözlü** 285 A knowledge-based expert system for technology acquisition in small and medium scale manufacturing organizations

SIMULATION TECHNOLOGY

Yasser A. Hosni and **Ayman M. Wasfy** 289 Conflict resolution—simulation language

Masanari Taniguchi, Masato Oki and **Tasuku Takagi** 293 3-Dimensional graphic image representation of holographic microscopical displacement pattern by using cubic spline function

K. A. Lapinski and **M. I. Dessouky** 297 Optimal selection of sampling locations and c-chart parameters

Masato Oki and **Toshio Onai** 301 Simulation of luminous environment in interior with windows by personal-computer

Tetsuo Yamaya and **Yoshihiko Ohtani** 305 On a measurement method of configuration factor distributions with the help of an electronic still camera and a personal computer

Eui H. Park, Celestine A. Ntuen, S. Vootla and **Y. H. Park** 309 Application of RAMCOST-II simulation model to space suit (kit-inventory) during a mission

ECONOMICS MANAGEMENT

Li Shuxia, Zhao Xin and **Zhang Xibao** 313 A composite model of macro-economic functioning of China

Byoung Nam Lee and **Ji Soo Kim** 317 Capital budgeting model with flexible budget

Rinzou Ebukuro 321 A macro-logical management approaches

Juho Hahm and **Myun W. Lee** 327 A systematic approach to business process reengineering

Hirokazu Osaki 331 Intelligential industrial management

Masayuki Abe and **Junsei Tsukuda** 335 An empirical analysis on built-in bias factors of financial accounting system

RELIABILITY & QUALITY CONTROL

Wei-Ting Kary Chien and **Way Kuo** 339 Use of the dirichlet process for reliability analysis

Dong Shang Chang and **Loon Ching Tang** 345 Random number generator for the Birnbaum–Saunders distribution

Chi-Hyuck Jun and **Moon Soo Choi** 349 Average run lengths of a control chart based on the sum of squared errors

Gary S. Wasserman 353 Short run SPC using dynamic control chart

Charles M. Parks, David A. Koonce, Luis C. Rabelo, Robert P. Judd and **John A. Sauter** 357 Model-based manufacturing integration: a paradigm for virtual manufacturing systems engineering

ERGONOMICS/HUMAN FACTORS

Suebsak Nanthavanij 361 An ergonomic assessment of fixed-height, partially adjustable, and fully adjustable VDT workstations by IntelAd

Dohyung Kee, Eui S. Jung and **Seong Rok Chang** 365 A man-machine interface model for ergonomic design

Eui S. Jung and **Sungjoon Park** — 369 Prediction of human reach posture using a neural network for ergonomic man models

Hiroshi Yokoyama, Shigekata Iwasaki, Mitsuru Oota and **Tadashi Ishiketa** — 373 Analysis of "Salary Man" motivation and the Will to Work (YARUKI)

Y. Sakai and **H. Noyama** — 377 An analysis of catastrophic behavior as a cause of human error

Y. Saito, T. Yamamoto, T. Kobayashi and **K. Arakawa** — 381 Study of individual differences in ERP by multivariate analysis of a few single trial ERPs

Toshinori Kobayashi — 385 Sleep package model—mathematical model for a sleep pattern

Kazushige Arakawa, Touru Ishikawa, Yasuhiko Saito and **Toshinori Kobayashi** — 389 Individual differences on diurnal variations of the task performance

Keun Sang Park and **Takao Ohkubo** — 393 A case study on the relationship between neuro-sensory work and work load

Sung H. Han, Eui S. Jung, Moo Young Jung, Jiyoung Kwak, Sungjoon Park and **Jaeho Choe** — 397 A psychophysical evaluation of interior design alternatives for a high speed train

OPTIMIZATION

V. M. Rao Tummala and **Yat-wah Wan** — 401 On the mean random inconsistency index of analytic hierarchy process (AHP)

Zhi-Wei Wang, Hiroyuki Nagasawa and **Noriyuki Nishiyama** — 405 A method for generating nondominated solutions to a multiobjective-headquarters, three-level decentralized system

Masamitsu Ohnishi, Tsutomu Morioka and **Toshihide Ibaraki** — 409 Optimal minimal-repair and replacement problem of discrete-time Markovian deterioration system under incomplete state information

QUEUEING THEORY

Ushio Sumita and **Yasushi Masuda** — 413 On pulse analysis of $G^x/G/\infty$ queues in tandem with correlated service times

Kuo-Hsiung Wang and **Chih-Ling Chang** — 417 Reliability of a controllable M/M/2 system with warm standbys operating under the triadic (0, *Q*, *N*, *M*) policy

Mitsuru Kuroda and **Akinobu Kawada** 421 Improvement on the computational efficiency of inverse queueing network analysis

Jung Bok Jo, Yasuhiro Tsujimura, Mitsuo Gen and **Genji Yamazaki** 425 Failure analysis of computer system based on fuzzy queueing theory

Masaaki Kijima and **Naoki Makimoto** 429 Computation of quasi-stationary distributions in Markovian queues

NEURAL NETWORKS

Kazunori Nagasaka, Naohiko Harada, Hidetomo Ichihashi and **Raymond Leonard** 433 Adaptive learning networks of multi-stage fuzzy production rules in expert system of grinding characteristics

Renchu Gan and **Dan Yang** 437 Case-based decision support system with artificial neural network

Andreas Bastian and **Jorge Gasós** 441 Modeling using regularity criterion based constructed neural networks

Junsei Tsukuda and **Shin-ichi Baba** 445 Predicting Japanese corporate bankruptcy in terms of financial data using neural network

Seiji Ishizu, Tadashi Takemae and **Haruo Saito** 449 Application of neuristor for character detection of spatial pattern

Eui H. Park, Celestine A. Ntuen, S. Vootla and **Y. H. Park** 453 Adaptive learning of human motion by a telerobot using a neural network model as a teacher

FUZZY SYSTEMS & APPLICATIONS

Yozo Nakahara and **Mitsuo Gen** 457 Formulation and analysis of fuzzy linear programming problems by user oriented ranking criteria

Long-zhu Li, Shi-yin Qin and **Bai-wu Wan** 461 Intelligent optimization method for large-scale systems with fuzzy parameters

Shinkoh Okada and **Mitsuo Gen** 465 Fuzzy shortest path problem

GENETIC ALGORITHMS

Jagabandhu Sridhar and **Chandrasekharan Rajendran** 469 A genetic algorithm for family and job scheduling in a flowline-based manufacturing cell

Rajesh Gangadharan and **Chandrasekharan Rajendran** 473 A simulated annealing heuristic for scheduling in a flowshop with bicriteria

Hyunchul Kim, Koichi Nara and **Mitsuo Gen** 477 A method for maintenance scheduling using GA combined with SA

Xiaofeng Yang and **Mitsuo Gen** 481 Evolution program for bicriteria transportation problem

Runwei Cheng and **Mitsuo Gen** 485 Crossover on intensive search and traveling salesman problem

Gary S. Wasserman and **Agus Sudjianto** 489 All subsets regression using a genetic search algorithm

LOGISTICS/PETRI NETS/GAME THEORY

Shigeru Yanagi and **Masafumi Sasaki** 493 Reliability analysis for a two-echelon repair system considering lateral resupply, return policy and transportation times

Qun Jin and **Yoshio Sugasawa** 497 Modeling and analysis of reliability performance for a distributed dual-processor system

Yoshio Sugasawa, Masashi Katsumata and **Atsushi Harada** 501 Stochastic petri net model of distributed process system with repair and its behavior analysis

Kyung Huy Lee and **Moo Young Jung** 505 Petri net application in flexible process planning

Hyung-Sik Oh 509 Duopoly model of a congested markets

IE/OR TRAINING AND EDUCATION

Manabu Ishihara and **Yorimasa Kuba** 513 An educational system of the information processing using the database on personal computer

Keytack H. Oh 517 Computers and industrial engineering education—perspectives from the University of Toledo

INFORMATION SYSTEMS

Norihide Hattori and **Naohiro Ishii** 521 Hierarchical representation for program control-structures by rewriting of flow graphs

Kunio Ando, Takahiro Iwata and **Genji Yamazaki** 525 Analysis of a slotted ring model with Cambridge type protocol

Jong-Kook Lee, Sang-Kyoon Kim, Hang-Joon Kim and **Jae-Uk Lee** 529 An extraction and segmentation of the picture and characters in Korean document

DATABASE DEVELOPMENT

Noritomi You, Yasuhiko Kato and **Masatoshi Kitaoka** 535 Numerous date in hierarchy for knowledge concentrated in decision tree

Kyung-Sik Kang, Tae-Ho Kim and **Il-King Rhee** 539 The establishment of standard time in die manufacturing process using standard data

Boaz Ronen, Ron Gur and **Shimeon Pass** 543 Focused management in military organizations: an avenue for future industrial engineering

CONCURRENT ENGINEERING

Shilong Ma and **Xiaolin Hu** 545 Formalizing computational river networks

Richard J. Gerth 549 A spreadsheet approach to minimum cost tolerancing for rocket engines

Choon Yup Park 553 Some dynamic measures for the economic worth of an investment

Linda J. Morris and **Larry A. Stauffer** 557 A design taxonomy for eliciting customer requirements

Masahide Watanabe, Kaihei Kuwata, Ryu Katayama, Takayoshi Kudou and **Yukiteru Nishida** 561 Adaptive tree-structured self generating radial basis function

pergamon

CINDDL 27 (1–4) 1–564 (1994)
